# VIBRATION ISOLATOR BROCHURE

## OVERVIEW:

- Wall mounted vibration isolators are color coded to identify capacity, and have encapsulated metal inserts for a fail-safe design. Each isolator incorporates two bolt-down holes on and one tapped steel load top plate for attachment to the supported equipment.

## CONSTRUCTION:

- One-piece molded neoprene mounts with encapsulated metal inserts.

## STANDARD SIZES:

| Vibration Isolator, Wall Mount |                                |
|--------------------------------|--------------------------------|
| Part No:                       | Isolator Weight Capacity (lb): |
| HW0351                         | 85                             |
| HW0352                         | 160                            |
