# FLOOR MOUNTED ISOLATOR KIT SPEC SHEET

## MODEL:

- VFK

## DESCRIPTION:

- Elastomeric isolators are compounded from neoprene, durulene, or special oil resistant compounds and are color coded by load range.

## CONSTRUCTION:

- All embedded metal parts have provisions for corrosion and weather-resistance. A tapped hole in the center of the mounting is provided to securely bolt to the equipment.

## STANDARD SIZES:

| Vibration Isolator Kit, Floor Mount<br>(VFK) |                                   |                              |
|----------------------------------------------|-----------------------------------|------------------------------|
| Part No:                                     | Isolator Weight<br>Capacity (lb): | Kit Weight<br>Capacity (lb): |
| VFK280                                       | 70                                | 280                          |
| VFK680                                       | 170                               | 680                          |
